Dear Hiring Team,

I am thrilled to apply for a software development position with your organization. With over eight years of experience as a Full Stack Software Developer, I bring a strong foundation in designing, building, and optimizing software solutions. My expertise spans backend and frontend development, cloud technologies, and agile methodologies, making me eager to contribute to your team's success.

In my recent roles, I've delivered scalable applications using modern tools and frameworks, collaborated effectively in fast-paced environments, and driven projects from concept to deployment. I'm skilled in multiple programming languages, cloud platforms, and containerization tools, with a focus on creating reliable, efficient systems. My ability to adapt, solve complex problems, and maintain high standards has consistently added value to diverse projects.

I am relocating to the USA and will reside near my new workplace, allowing me to work on-site without difficulty. As a Canadian citizen with a U.S. Green Card appointment scheduled for March 25, 2025, for my IR1-Visa, I require no sponsorship and expect to be available to start by April 14, 2025. My educational background in software development and analytical studies further strengthens my technical and problem-solving skills.

I am excited about the opportunity to bring my experience and enthusiasm to your team. I'd welcome the chance to discuss how I can support your goals. Thank you for considering my application!

Sincerely,

Taranjit Kang
